

UL 752 BALLISTIC RESISTANT PERIMETER SECURITY WALL

EKHO precast panels are exceptionally designed and engineered to meet the ultimate needs of perimeter safety and security of today.

Our modular steel or concrete post panel systems are ballistic resistant tested UL 752 levels 1-10.

rifle full metal
copper jacket
with lead core:
AR-15, 5 round
pattern

EKHO Ballistic Wall Systems offer a higher margin of safety over traditional precast barriers by containing and preventing the spread of fire.

Our barriers meet the industry standards that matter most to electric utilities, including UL 752 LEVEL 1-10, IEEE 979 and NFPA 850 & 851 codes.

Posts and panel walls can be designed to support lighting, cameras, and can be integrated with controlled entry systems, doors and gates.
